

Joint Strike Fighter (JSF) Instructional Systems Designs

Scope

- Analysis and design of pilot and maintenance training for a joint DoD ACAT 1D major acquisition program
- Training designed for 13 services from eight countries with multiple target audiences and unique training requirements
- Supporting three aircraft variations and multiple block configurations

Highlights

- Analyzed seven mission groups and 23 missions for pilot training
- Implemented an agile approach to account for concurrent aircraft and training system development—significantly reduced program risk

ISO 9001:2008 CERTIFIED
